¹⁾ Z-input for 750-636 version.

²⁾ External 24V UA motor voltage for 750-636/000-800 version only.

This module is a 1-channel intelligent positioning controller for 24VDC motors up to 5A with incremental position feedback. Three 24V inputs record the limit switches and a preset signal. An incremental encoder interface evaluates the signals from the position transmitter and determines actual value.

If required, the positioning optimizes the pre-stop position depending on direction and takes backlash compensation into account.

Bi-directional control of the DC motor is done via short-circuit proof and temperature-monitored H-bridge. Both switched operation and soft-start/stop or current reduction are possible through PWM control.

The field-side 24V supply voltage (20-28VDC) from the power contacts, which is monitored for undervoltage/overvoltage events, is looped through to adjacent modules.

| Description | Item No. | Pack. Unit |
|-------------------------------|-----------------|------------|
| DC Drive Controller 24V/5A | 750-636 | 1 |
| DC-Drive Controller 24V/5A/R* | 750-636/000-800 | 1 |
| DC Drive Controller 24V/5A/T | 750-636/025-000 | 1 |

(Operating temperature -20 °C ... +60 °C)

* /R: Interference-free for safety function applications (see manual)
